

IHKAAS

Ihlas – Trusted World

White Paper

Disclaimer: Investing in cryptocurrencies involves risks, and IHKAAS Crypto cannot guarantee profits or project success. While we are committed to making every effort to build a robust and innovative ecosystem, the future is influenced by numerous factors beyond our control. Every investor is solely responsible for their decisions, and we encourage careful consideration before participating. Our goal is to create value and satisfaction for all stakeholders, but uncertainties in the market remain. By engaging with IHKAAS, you acknowledge these risks and accept full responsibility for your investment choices.

XIII. Join Us in Revolutionizing Digital Commerce	19

Introduction to the IHKAAS Project

The IHKAAS Project is a groundbreaking initiative aimed at revolutionizing online transactions and digital commerce through the innovative use of our cryptocurrency, IHKAAS. At the heart of our project is the IHKAAS online mall, a comprehensive marketplace featuring various departments and shops designed to create a seamless, secure, and socially responsible ecosystem for our customers and partners. Our goal is to establish a fee structure for every product bought from our store to facilitate the burning of the total supply of our IHKAAS cryptocurrency, thereby increasing its value and scarcity.

Mission

Our mission is to revolutionize online transactions and digital commerce through the innovative use of IHKAAS cryptocurrency. We aim to foster community engagement, drive positive social impact, and reshape the way people buy, sell, and interact between the digital and real worlds. By establishing an online IHKAAS mall with diverse departments and shops, we strive to create a seamless, secure, and socially responsible ecosystem for our customers and partners. Reaching a certain value of IHKAAS crypto will make our dream come true: creating an IHKAAS Mall centre in the metaverse and a real-world IHKAAS Mall centre that will be integral to our everyday lives.

Vision

Our vision is to build a robust and versatile cryptocurrency ecosystem that integrates IHKAAS into everyday life (virtual and real life), making it the preferred medium of exchange for online shopping, entertainment, education, and charitable donations. We aspire to create a sustainable and inclusive digital economy that empowers individuals, supports philanthropic efforts, and enhances the value and utility of IHKAAS Gold as our primary cryptocurrency.

Our stores

IHKAAS Crypto: This crypto will revolutionize online transactions, allowing online shopping with cryptocurrency, fostering community engagement, and driving positive social impact by donating to the poor. We aim to reshape the way people buy, sell, and interact between the digital and real worlds today and much more in the future with our services:

- o **IHKAAS Gold:** This is the foundation of our cryptocurrency ecosystem, facilitating seamless transactions for buying, selling, and transferring value within the blockchain. From online shopping to everyday purchases, IHKAAS Gold serves as the primary medium of exchange, offering security, speed, and reliability. By actively using IHKAAS Gold in transactions, customers contribute to its liquidity and value, ultimately aiding the growth and success of our main cryptocurrency.

o **IHKAAS Blue:** This introduces a new dimension of utility for entertainment, online sessions, educational lectures, and event payments. Customers can use IHKAAS Blue tokens to access digital content, attend virtual events, or pay for related services. By embracing IHKAAS Blue for various activities, customers support the growth and value of IHKAAS Gold.

o **IHKAAS Red:** Dedicated to reducing the total supply of our coin, serving as a mechanism for scarcity and value appreciation. Customers can participate in this process by donating IHKAAS Red tokens, purchasing products from our online store with a slight premium to contribute to burning the total supply, or choosing to donate directly towards burning the total supply. Additionally, customers who contribute to burning the total supply may receive incentives or discounts, further incentivizing participation. By actively engaging with IHKAAS Red, customers directly impact the scarcity and value of IHKAAS Gold, our main cryptocurrency.

o **IHKAAS Green:** Represents the future of our cryptocurrency ecosystem, with plans for use in restaurants and shops operated by IHKAAS Company once a specific fundraising goal is achieved. Customers can anticipate using IHKAAS Green tokens for payments at future establishments, thereby fostering demand and adoption. By supporting IHKAAS Green initiatives, customers contribute to the realization of our long-term vision and indirectly support the growth and value of IHKAAS Gold, our main cryptocurrency.

IHKAAS White: Embodies our commitment to philanthropy and social impact, providing customers with the opportunity to support charitable causes aimed at helping communities in Africa and endangered groups worldwide. By using IHKAAS White tokens for donations, customers not only make a positive difference in the world but also indirectly contribute to the reputation and value of IHKAAS Gold, our main cryptocurrency. Join us in making a meaningful impact while also supporting the growth and prominence of IHKAAS Gold.

IHKAAS NFT Marketplace: This platform will sell NFTs created by IHKAAS members and supporters, as well as IHKAAS Green, Blue, White, Red, and Gold tickets for special purposes mentioned in "Buy IHKAAS Crypto." The NFT platform is currently being updated to meet expansion and quality needs.

Online Shop: Carefully selected products with the best quality and price. The IHKAAS Online Shop comprises 10 categories:

- Clothes: with subcategory Men, Women, and Children
- Shoes: with subcategory Men, Women, and Children
- Children: with subcategory Toys, Kids, and Babies
- Healthy: with subcategory Beauty and Hair

- Sports: with subcategory Equipment and Apparel
- House: with subcategory Decoration and Garden
- Upgrades: with subcategory Car, Motorcycle, and Bicycle
- Accessories: Jewellery, Watches, and AI Tools
- Electronics: with subcategory TV, Mobile, PCs, and Tablets
- Animals: with subcategory Dog, Cat, and Bird

Web Design: We design and maintain websites for customers with three package options: IHKAAS Little, IHKAAS Medium, and IHKAAS Large. Companies without their own websites that agree to cooperate with IHKAAS and implement a system fee for burning tokens from our total supply receive up to a 50% discount and free advertising on our IHKAAS web page.

Product Design: Where creativity meets convenience. We offer easy and fast design options for products such as T-shirts, caps, mugs, hoodies, sneakers, bags, phone cases, pillows, and carts. Our software, built with HTML5 and JavaScript, focuses on user experience and provides a comprehensive solution for print services. It features a user-friendly interface to facilitate easy design of any idea. We also do not exclude the possibility of adding new design products normally according to the needs and requests of users.

Partnerships and Community Engagement

We are also open to partnerships with other companies that support burning the total supply of IHKAAS crypto. In return, we offer free advertising on our website. Companies interested in working with us can apply by filling out a simple form and will receive a response within 24 hours. Information from our golden partners will be showcased with 3D business cards on our website to enhance their business presence.

Golden Partnership:

Exclusive partnership for companies aligning with IHKAAS values and integrating IHKAAS cryptocurrency. Benefits include:

- IHKAAS crypto payment acceptance
- Burning fee contribution
- Priority access to future IHKAAS Mall spaces
- Premium visibility on platforms

Normal Partnership:

Collaboration opportunities for affiliate, referral, and commission-based partnerships. Features:

- Logo placement on website
- Promotion through affiliate/referral links
- Commission allocation for burning IHKAAS tokens

Benefits:

- Increased exposure
- No direct costs
- Support for IHKAAS ecosystem

Partnerships contribute to IHKAAS Project's mission of strengthening its cryptocurrency ecosystem through innovative mechanisms like token burning.

Strategic Goals for IHKAAS Project

Market Penetration and Adoption:

- o Increasing the adoption of IHKAAS cryptocurrency for online transactions by partnering with popular e-commerce platforms and service providers.
- o Promoting the use of IHKAAS Gold, Blue, Red, Green, and White through targeted marketing campaigns and educational initiatives.

Community Engagement and Growth:

- o Fostering a vibrant and engaged community by organizing online events, webinars, and forums where users can share experiences and ideas.
- o Launching social impact initiatives that leverage IHKAAS White for philanthropic efforts, building a strong reputation for social responsibility.

Technological Innovation:

- Investing in cutting-edge technology to ensure the security, speed, and reliability of IHKAAS transactions.
- o Exploring and integrating advanced blockchain features to enhance the functionality and scalability of the IHKAAS ecosystem.
- o Creating our own blockchain technology to ensure maximum control and customization of the IHKAAS ecosystem.

Economic Sustainability:

- o Implementing a strategic fee structure for transactions within the IHKAAS mall to facilitate the burning of IHKAAS tokens, thereby maintaining scarcity and increasing value.
- o Developing incentive programs for users who actively participate in token burning and other value-adding activities.

Expansion of Services:

- o Expanding the IHKAAS Online Shop to include more categories and products based on user demand and market trends.
- o Introducing new services, such as web and product design, with attractive packages and discounts for partners who support the IHKAAS ecosystem.

Metaverse Integration:

- o Establishing a presence in the metaverse by creating a virtual IHKAAS Mall that offers an immersive shopping experience.
- o Collaborating with virtual reality and augmented reality developers to integrate IHKAAS cryptocurrency into metaverse platforms.

Real-World Application:

- o Achieving fundraising goals to establish IHKAAS Green initiatives, such as restaurants and shops, facilitating the use of IHKAAS tokens in real-world scenarios.
- o Developing strategic partnerships with businesses to accept IHKAAS tokens, thereby expanding the cryptocurrency's utility in everyday life.

Educational Outreach:

- o Creating comprehensive educational resources to help users understand the benefits and uses of IHKAAS cryptocurrency and tokens.
- o Hosting workshops and training sessions to educate users on blockchain technology, cryptocurrency investments, and digital commerce.

Philanthropy and Social Impact:

- Using IHKAAS White to support charitable causes and initiatives, focusing on underprivileged communities and endangered groups worldwide.
- o Promoting transparency and accountability in all philanthropic activities to build trust and credibility within the community.

Short-Term Goals (Year 1-2)

Presale & Market Entry

- Conduct a **presale** with an initial duration of a few **months**, with the possibility of controlled extensions if necessary.
- Complete **Cyberscope verification** to ensure contract security and transparency.
- **Lock €17,000 liquidity for 3 years**, reinforcing long-term project stability.
- **IHKAAS trading goes live**, allowing market participants to buy and sell the token.
- Secure **initial exchange listings** on accessible **small and mid-tier exchanges**, improving liquidity and token accessibility.

IHKAAS Ecosystem Enhancements

- **IHKAAS Red**: Implement **burning statistics** for transparency and introduce a **voluntary burning feature**.
- **IHKAAS White**: Launch **charity initiatives**, including **water projects, food and clothing aid**, and other humanitarian efforts.
- **IHKAAS Blue**: Introduce **online sessions, educational lectures, and event payments** to enhance community engagement.
- **IHKAAS Green**: Prepare for future **integration into restaurant and retail payments**, either post-mall launch or earlier via strategic partnerships.
- **Deploy the NFT marketplace**, expanding the IHKAAS ecosystem with digital assets and collectibles.

Business & Community Growth

- **Initiate marketing campaigns** to promote **IHKAAS Gold adoption**, increasing project visibility.
- **Conduct five educational webinars** on blockchain technology, cryptocurrency adoption, and IHKAAS ecosystem benefits.
- **Introduce user incentives for token burning**, reinforcing a deflationary model and long-term token value.
- **List on larger mid-tier exchanges** after initial launch, further strengthening liquidity and market adoption.

Medium-Term Goals (Year 3-5)

Advanced Exchange Listings

- **Strengthen liquidity pools** to enhance trading stability and long-term sustainability.
- **Apply for listings on top-tier exchanges**, including **Binance, Coinbase, and Kraken**, to expand IHKAAS's global market presence.

Business & Token Adoption Growth

- **Expand IHKAAS token adoption** across various industries, increasing its real-world utility.
- **Implement strategic fee structures** for transactions to support **continuous token burning**, ensuring long-term scarcity and value appreciation.
- **Secure 10+ business partnerships**, integrating **IHKAAS token as a payment option** in real-world businesses.

Education & Community Growth

- **Organize tech conferences** focusing on cryptocurrency adoption, blockchain innovation, and IHKAAS's role in the digital economy.

Long-Term Goals (Year 5-10)

Year 5-7: Global Expansion & Mass Adoption

- **Achieve widespread use of IHKAAS cryptocurrency**, making it a recognized and trusted digital asset for transactions.
- **Form international partnerships** with businesses, institutions, and financial platforms to promote **IHKAAS as a preferred payment method** globally.

Metaverse & AI-Driven Commerce

- **Develop AI-driven commerce solutions** for the **Virtual IHKAAS Mall**, enabling automated and personalized shopping experiences.

Year 7-10: Sustained Ecosystem Development

- **Introduce new IHKAAS services** based on market trends and user demands to ensure continuous innovation.
- **Maintain cutting-edge blockchain security and scalability**, optimizing speed, efficiency, and user safety.

Decentralized Community Governance

- **Implement a decentralized governance model**, allowing the community to participate in decision-making and future development.
- **Realize the full vision of the IHKAAS ecosystem**, integrating it seamlessly across both **virtual** and **real-world** applications.

Physical Business Integration

- **Expand IHKAAS White charity initiatives worldwide**, addressing critical issues such as **clean water access, food security, clothing, and humanitarian aid**.
- **Implement IHKAAS Green in physical locations**, enabling **restaurants, shopping centers, and retail businesses** to accept IHKAAS tokens as a standard payment method.

Beyond 10 Years: IHKAAS Mall & Payment Integration

- **IHKAAS Mall Realization**: Build the **physical IHKAAS Mall** upon successful roadmap completion.
- **Integrated Token Burning System**: Every store (clothing, shoes, restaurants, food markets, electronics, etc.) in the physical and online mall will contribute to **token burning via an IHKAAS fee** on product sales.
- **IHKAAS as a Payment Standard**: Establish IHKAAS cryptocurrency as a leading payment option across all stores.

Summary Timetable

Timeframe	Key Objectives
Year 1-2 (Short-Term Goals)	Presale & Market Entry : Conduct a 3-month presale with possible extensions. Complete Cyberscope verification for contract security. Lock €17,000 liquidity for 3 years. Launch IHKAAS trading and secure initial exchange listings on small and mid-tier exchanges .
	IHKAAS Ecosystem Enhancements : Update IHKAAS Red (burning statistics, voluntary burning feature), IHKAAS White (charity initiatives:

	water projects, food/clothing aid), IHKAAS Blue (online sessions, educational lectures, event payments), and prepare IHKAAS Green (future restaurant and retail payment integration). Deploy the NFT marketplace .
	Business & Community Growth: Launch marketing campaigns to promote IHKAAS Gold. Conduct five educational webinars on blockchain adoption. Introduce user incentives for token burning . List on larger mid-tier exchanges post-initial launch.
Year 3-5 (Medium-Term Goals)	Advanced Exchange Listings: Strengthen liquidity pools for stability. Apply for top-tier exchange listings (Binance, Coinbase, Kraken).
	Business & Token Adoption Growth: Expand IHKAAS token adoption across industries. Implement strategic fee structures to facilitate continuous token burning . Secure 10+ business partnerships integrating IHKAAS as a payment option.
	Education & Community Growth: Organize large-scale blockchain workshops and tech conferences on cryptocurrency adoption and blockchain innovation.
Year 5-10 (Long-Term Goals)	Year 5-7: Global Expansion & Mass Adoption: Achieve widespread IHKAAS adoption . Form international partnerships to promote IHKAAS as a preferred global payment method .
	Metaverse & AI-Driven Commerce: Develop AI-driven commerce solutions for the Virtual IHKAAS Mall , enhancing user experience.
	Year 7-10: Sustained Ecosystem Development: Introduce new IHKAAS services to meet market demands. Maintain advanced blockchain security and scalability .
	Decentralized Community Governance: Implement decentralized governance to allow community-driven decision-making. Fully integrate the IHKAAS ecosystem into virtual and real-world applications.
	Physical Business Integration: Expand IHKAAS White charity efforts worldwide (clean water, food security, humanitarian aid). Implement IHKAAS Green across restaurants, shopping centers, and retail businesses for real-world token transactions.
Beyond 10 Years	IHKAAS Mall Realization: Build the physical IHKAAS Mall upon successful roadmap completion.
	Integrated Token Burning System: Every store (clothing, shoes, restaurants, food markets, electronics, etc.) in the physical and online malls will contribute to token burning via an IHKAAS fee .
	IHKAAS as a Payment Standard: Establish IHKAAS cryptocurrency as a leading digital payment option across global businesses.

IHKAAS Tokenomics

We are pleased to present the tokenomics structure for IHKAAS crypto, designed to ensure sustainable growth, market stability, and community support. Below is the detailed allocation of our total supply of 10,000,000,000 tokens, along with the tax structure for buying and selling transactions.

Token Allocation

1. Presale: 30%

- **Tokens Allocated:** 3,000,000,000
- **Purpose:** The presale allocation is dedicated to early investors who believe in our project and wish to support it from the outset. These tokens are offered at a discounted rate to incentivize early participation and raise initial funding for the project's development.

```
function ProductSaleBurn(uint256 amount) external onlyOwner{
    require(amount > 0, "Amount must be greater than zero");
```

2. Liquidity: 25%

- **Tokens Allocated:** 2,500,000,000
- **Purpose:** To ensure long-term market stability, flexibility and trading volume, 25% of the tokens will be locked in liquidity. The liquidity will initially be locked for 3 years and will be relocked in 3-year increments. Additionally, the liquidity pool will grow over time using funds from the burning wallet, increasing the pool size every 3 years to support sustainable growth.

```
uint256 public constant LOCK_DURATION = 3 * 365 * 24 * 60 * 60; // Fixed lock duration:
3 years
function lockTokens(address lpToken, uint256 amount) external nonReentrant {
    require(msg.sender == LIQUIDITY_ADDRESS, "Only the liquidity wallet can lock
tokens");
    require(lpToken != address(0), "Invalid LP token address");
    require(amount > 0, "Amount must be greater than zero");
```

3. Marketing & Advertising: 7%

- **Tokens Allocated:** 700,000,000
- **Purpose:** This allocation is dedicated to promoting the project and attracting new users. The funds will be used for various marketing campaigns, advertising efforts, and partnerships to increase visibility and drive growth.

4. Ecosystem and Community Benefits: 6%

- **Tokens Allocated:** 600,000,000
- **Purpose:** These tokens are reserved for the development and enhancement of the IHKAAS ecosystem and to provide benefits to the community. This includes funding for ecosystem improvements, user incentives, and community-building activities.

5. Charity: 3%

- **Tokens Allocated:** 300,000,000
- **Purpose:** In line with our commitment to social responsibility, 3% of the tokens are allocated for charitable activities. These tokens will be used to support philanthropic initiatives and community projects, demonstrating our dedication to making a positive impact.

6. IHKAAS Mall: 8%

- **Tokens Allocated:** 800,000,000
- **Purpose:** This allocation is dedicated to building the IHKAAS Mall, a central hub that will feature restaurants, stores from our partners, humanitarian kitchens, educational centers, entertainment facilities for young people and families, and more. The IHKAAS Mall will accept IHKAAS crypto as one of the payment options. Additionally, a burning fee of 1.5% will be applied to every single product purchased within the IHKAAS Mall to help control the token supply and maintain value.

```
function productSale(address seller, uint256 amount) external nonReentrant {  
    require(seller == msg.sender, "You can only burn your own tokens");  
    require(seller != address(0),
```

7. Team: 4%

- **Tokens Allocated:** 400,000,000
- **Purpose:** To reward the dedicated team behind IHKAAS and to provide long-term incentives for continued development and commitment, 4% of the tokens are allocated to the project team. This ensures that our team remains motivated to drive the project forward.

8. Burning Wallet: 17%

- **Tokens Allocated:** 1,700,000,000

- **Purpose:** The burning wallet is designed to manually and automatically reduce the token supply. It will accumulate tokens from:
 - o The 1% tax from buying and selling transactions.
 - o Fees generated from product sales in the IHKAAS Mall.
 - o Voluntary contributions from donors and supporters.
 - o Manual burns to manage supply as needed.
- **Liquidity Growth:** After 3 years, tokens from the burning wallet will be used to increase the liquidity pool, further stabilizing the market and ensuring smoother trading operations. This process will be repeated every 3 years to create a stronger liquidity base over a 9-year period.

```
address _burnAddress = 0x0000000000000000000000000000000000000000000000000000000000000000dEaD;

function ProductSaleBurn(uint256 amount) external onlyOwner{
    require(amount > 0, "Amount must be greater than zero");

function productSale(address seller, uint256 amount) external nonReentrant {
    require(seller == msg.sender, "You can only burn your own tokens");
    require(seller != address(0), "Invalid seller address");
```

The contract facilitates both manual and automatic burning of tokens

```
function burn(uint256 amount) public nonReentrant returns (bool)
totalSupply -= amount;
    totalBurnedTokens += amount;
    super._transfer(sender, _burnAddress, amount);
return true;
```

Explanation: The burning mechanism supports scarcity and long-term value appreciation

Tax Structure To maintain a healthy token economy, we have implemented a tax structure on all buying and selling transactions:

1. Buying Tax: 2%

- ✓ **Burning:** 1% of tokens from each buying transaction will be sent to the burning wallet to control the supply and increase scarcity.
- ✓ **Liquidity Pool:** 1% of tokens from each buying transaction will be added to the liquidity pool to ensure market stability.

2. Selling Tax: 2%

- ✓ **Burning:** 1% of tokens from each selling transaction will be sent to the burning wallet to further manage the token supply and maintain value.
- ✓ **Liquidity Pool:** 1% of tokens from each selling transaction will be added to the liquidity pool to support smooth trading operations.

```
uint256 public liquidityFeeonBuy = 1;
uint256 public burnFeeOnBuy = 1;

uint256 public liquidityFeeonSell = 1;
uint256 public burnFeeOnSell = 1;
```

3. Transaction Tax 2%

- ✓ **Burning:** 1% of tokens from each transaction will be sent to the burning wallet to further manage the token supply and maintain value.
- ✓ **Liquidity Pool:** 1% of tokens from each transaction will be added to the liquidity pool to support smooth trading operations.

```
// Buy transaction
    liquidityFee = (amount * liquidityFeeonBuy) / 100;
    burningFee = (amount * burnFeeOnBuy) / 100;
} else if (to == uniswapV2Pair) {
    // Sell transaction
    liquidityFee = (amount * liquidityFeeonSell) / 100;
    burningFee = (amount * burnFeeOnSell) / 100;
} else if (isWalletToWallet) {
    // Wallet-to-wallet transfer
    liquidityFee = (amount * liquidityFeeonBuy) / 100; // Use buy fee for
simplicity
    burningFee = (amount * burnFeeOnBuy) / 100;
```

Summary of Token Allocation

- Presale: 30% (3,000,000,000 tokens)
- Liquidity: 25% (2,500,000,000 tokens, locked in 3-year increments)
- Marketing & Advertising: 7% (700,000,000 tokens)
- Ecosystem and Community Benefits: 6% (600,000,000 tokens)
- Charity: 3% (300,000,000 tokens)
- IHKAAS Mall: 8% (800,000,000 tokens)
- Team: 4% (400,000,000 tokens)
- Burning Wallet: 17% (1,700,000,000 tokens for manual and automatic burns, and future liquidity growth.)

```
// Mint total supply and allocate to different addresses with decimals
_mint(PRESALE_ADDRESS, (_supply * 30 * (10**_decimals)) / 100); // 30% for presale
_mint(LIQUIDITY_ADDRESS, (_supply * 25 * (10**_decimals)) / 100); // 25% for liquidity
_mint(BURNING_ADDRESS, (_supply * 17 * (10**_decimals)) / 100); // 17% for liquidity
_mint(ECOSYSTEM_ADDRESS, (_supply * 6 * (10**_decimals)) / 100); // 6% for ecosystem
_mint(ADVERTISING_ADDRESS, (_supply * 7 * (10**_decimals)) / 100); // 7% for advertising
_mint(MALL_ADDRESS, (_supply * 8 * (10**_decimals)) / 100); // 8% for mall
_mint(CHARITY_ADDRESS, (_supply * 3 * (10**_decimals)) / 100); // 3% for charity
_mint(Team_ADDRESS, (_supply * 4 * (10**_decimals)) / 100); // 4% for team
```

Tax Structure

• Buying Tax: 2%

- Burning: 1%
- Liquidity Pool: 1%

Selling Tax: 2%

- Burning: 1%
- Liquidity Pool: 1%

Transaction Tax: 2%

- Burning: 1%
- Liquidity Pool: 1%

Our tokenomics model is designed to foster a healthy ecosystem, support sustainable growth, and deliver long-term value to our investors and community. We are committed to transparency, innovation, and social responsibility as we drive the IHKAAS crypto project forward.

Security and Compliance

Security and trust are at the heart of the IHKAAS Project. To reinforce this commitment, we plan to have our smart contract audited by **Cyberscope**, a reputable blockchain security firm. This audit will ensure that our contract is secure, robust, and free from vulnerabilities, providing peace of mind to our community and investors.

In addition, we will complete a **KYC (Know Your Customer)** process to enhance transparency and accountability. These measures underline our dedication to maintaining the highest standards of trustworthiness and compliance.

It's important to note that the audit and KYC processes will be funded upon the successful completion of the presale. A portion of the raised funds will be allocated to ensure the contract's security and compliance, further demonstrating our commitment to building a sustainable and reliable ecosystem.

```
function blockBots(address[] memory bots_) public onlyOwner {  
    for (uint256 i = 0; i < bots_.length; i++) {  
        bots[bots_[i]] = true;  
    }  
}
```

Real-Time Tracking and Transparency -Purpose: Provide visibility into important contract actions.

```
event LiquidityLocked(uint256 indexed lockId, address indexed locker, address indexed lpToken, uint256 amount, uint256 lockUntil);  
event TokensTransferredToPublicSale(address indexed from, uint256 amount);  
event TokensBurnedInPublicSale(uint256 amount);
```

Conclusion

The IHKAAS Project is a groundbreaking initiative that aims to revolutionize digital commerce and online transactions through the innovative application of cryptocurrency. By integrating IHKAAS into a multifaceted ecosystem—including an extensive online mall, an NFT marketplace, and philanthropic initiatives—we are building a platform that goes beyond being a medium of exchange. IHKAAS fosters community engagement and drives meaningful social impact.

Our commitment to continuous innovation, strategic partnerships, and the responsible use of our cryptocurrency, IHKAAS Gold, ensures the creation of a sustainable and inclusive digital economy. With meticulously structured tokenomics that maintain scarcity and value, and a clear roadmap for future expansion and technological innovation, IHKAAS is positioned to become a trailblazer in the digital economy.

As we advance, our strategic goals focus on market penetration, platform development, community engagement, and the integration of real-world applications with metaverse experiences. Our short-term, medium-term, and long-term plans are designed to achieve widespread adoption and establish IHKAAS as a leading example of socially responsible digital commerce.

We are embarking on an exciting journey to revolutionize how we interact with the digital and physical worlds. Together, we can make IHKAAS crypto the preferred currency for online shopping, entertainment, education, and charitable giving, contributing to a more socially responsible and impactful future.

Join Us in Revolutionizing Digital Commerce

The IHKAAS Project is more than just a cryptocurrency—it's a vision for creating a better, more inclusive digital economy. Join us as we reshape the future of online transactions, foster community engagement, and drive positive social change.

Together, we can create a sustainable, inclusive, and impactful cryptocurrency ecosystem that empowers individuals and communities worldwide. Let's unify our efforts to turn dreams into reality.

We dream of the day when the IHKAAS Mall becomes a thriving reality—a hub for innovation, connection, and opportunity. Together, we can make it happen!
